

Special Issue

Clinical Treatment in Anosmia

Message from the Guest Editors

We are pleased to invite you to submit a manuscript to this Special Issue, which aims to describe all the available treatment options for this pathology, including medications, olfactory training and various novel therapies. The insertion of biologics into sinonasal disease management, olfactory training modifications and platelet-rich plasma injections are all examples of recent advances in the field; these are accompanied by studies concerning future therapeutic options such as olfactory implants, stem cell therapies and gene therapy. It is evident that the whole scientific field of OD treatment has garnered significant research interest. This Special Issue aims to focus on these efforts in order to present recent clinical and experimental research on anosmia treatment worldwide. In this Special Issue, original research articles and reviews are welcome. The scope of this Special Issue includes the following: studies on local and systemic medications, olfactory training, novel therapies, future options, and patient perspectives.

Guest Editors

Dr. Iordanis E. Konstantinidis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
