Clinical Advances in the Gallbladder and Biliary Tract Diseases

Message from the Guest Editor

Gallbladder and biliary tract diseases constitute one of the most challenging clinical issues within gastrointestinal diseases. In recent decades, innovative diagnostic tests, genetic studies, and new pharmacologic and endoscopic therapies have helped clinicians to develop a better understanding of such complex disorders. The aim of this Special Issue is to update current knowledge in this topic: the pathway from the biochemical and clinical diagnosis to the last novelties in the treatment of autoimmune, infectious, neoplastic or gallstone-related biliary diseases. We encourage you to share your scientific article in order to increase the current knowledge in this topic and implement new approaches in clinical practice. Dr. Antonio M Caballero-Mateos

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
