Clinical Management of Pediatric Heart Diseases

Message from the Guest Editor

With the changing epidemiology of CHD, chronicity has become the keyword in pediatric cardiology, making long-term management and quality of life essential components of patient care. For individuals with CHD, integrated care plans addressing the medical, functional, and psychosocial aspects of treatment are increasingly being recognized as critical. Despite progress, sudden cardiac death continues to represent a serious complication in CHD patients. However, there is a notable lack of pediatric-specific research in this area, with risk stratification models often extrapolated from studies in ACHD populations. In recent decades, our awareness of genetic and rare cardiovascular diseases has introduced the need for a tailored approach; nevertheless, the evolution of personalized medicine has not fully reached the world of pediatric cardiology. This Special Issue will focus on advances and applications in imaging, surgery, interventional cardiology, sports cardiology, prognostic stratification, and follow-up studies addressing the clinical management of pediatric heart diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
