

Special Issue

State of the Art in Cataract and Refractive Surgery

Message from the Guest Editor

Cataract surgery is the most common surgical procedure. It undisputably improves visual functioning dramatically, which in turn gives great improvement in a person's quality of life. Numerous advances in instrumentation and medical treatment have increased the safety of the procedure, even in complicated cases. Moreover, advances in intraocular lens design and biometry have further increased patients' and doctors' expectations of cataract surgery. It is considered not only as an operation that restores vision but also as a refractive procedure that minimizes if not eliminates the use of glasses. Refractive surgery, likewise, is continuously evolving. New techniques with an improved safety and predictability profile are coming into practice, aiming to provide refractive results that match the increased expectations of the patients. Accordingly, we would like to announce a Special Issue called "State of the Art in Cataract and Refractive Surgery". This Special Issue calls for original research and reviews that have investigated new techniques in cataract and refractive surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
