State of the Art in Cataract and Refractive Surgery

Message from the Guest Editor

Cataract surgery is the most common surgical procedure. It undisputably improves visual functioning dramatically, which in turn gives great improvement in a person's quality of life. Numerous advances in instrumentation and medical treatment have increased the safety of the procedure, even in complicated cases. Moreover, advances in intraocular lens design and biometry have further increased patients' and doctors' expectations of cataract surgery. It is considered not only as an operation that restores vision but also as a refractive procedure that minimizes if not eliminates the use of glasses. Refractive surgery, likewise, is continuously evolving. New techniques with an improved safety and predictability profile are coming into practice, aiming to provide refractive results that match the increased expectations of the patients. Accordingly, we would like to announce a Special Issue called "State of the Art in Cataract and Refractive Surgery". This Special Issue calls for original research and reviews that have investigated new techniques in cataract and refractive surgery.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
