Clinical Advances in Plastic and Aesthetic Surgery

Message from the Guest Editor

During the past few decades, plastic surgery has experienced tremendous advancements. New techniques have been introduced while new data allow a better understanding of procedures already established. In particular, recently introduced microsurgical options have provided a larger spectrum of free flaps available to permit a more tailored reconstruction, while new technologies have been implemented to allow better flap surveillance and minimize necrosis. New techniques, also possibly combined with newly developed materials, have also permitted easier solutions to complex reconstructive challenges. In the context of aesthetic surgery, new trends have been observed with some procedures gaining increased popularity, such as labia minora reduction and gluteal augmentation. Conversely, well-established procedures have been further developed to ensure better outcomes. The aim of this Special Issue is to present recent advances in the field of plastic, reconstructive, and aesthetic surgery. Therefore, researchers in the field of plastic surgery are invited to submit original articles or reviews to this Special Issue (case reports and short reviews are not accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
