

Special Issue

Advances in Diagnosis and Management of Scoliosis

Message from the Guest Editor

This Special Issue seeks to explore cutting-edge developments in understanding, diagnosing, and treating scoliosis and related spinal deformities. We invite submissions that address innovations in surgical techniques, including minimally invasive approaches and their impact on patient outcomes. Topics of interest include compensation mechanisms after deformity correction and risk stratification to improve surgical safety and efficacy. Contributions that examine long-term functional outcomes, postoperative complications, or the management of complex cases with concurrent conditions are highly encouraged. This issue aims to foster multidisciplinary research that enhances personalized care and advances therapeutic strategies for scoliosis and related spinal deformities, ultimately improving the quality of life for affected patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France
