Cardiac Electrophysiology and Catheter Ablation of Different Arrhythmias

Message from the Guest Editors

The catheter ablation of cardiac arrhythmias has evolved over the past few decades, using different techniques and energies, and has proven to be superior to pharmacological therapy in various clinical settings. Understanding the underlying electrophysiological mechanisms and correlated anatomical substrates remains crucial to guide successful ablation and improve clinical outcomes. Despite massive advances in catheter ablation safety and efficacy, many challenging arrhythmias and conditions require further studies and research to optimize arrhythmic patient care. The scope of this Special Issue, "Cardiac Electrophysiology and Catheter Ablation of Different Arrhythmias", focuses on cardiac arrhythmias management, including, but not limited to, diagnosis, intracardiac mapping, and catheter ablation. Original or review articles addressing novel ablation technologies or energies, state-of-the-art reviews, gaps in the current knowledge, and challenging arrhythmic conditions are welcome. Case reports, or case series, will also be considered if they are novel, provide high educational value, and/or may substantially impact the daily clinical practice.

Guest Editors

Dr. Hussam Ali

Arrhythmia and EP Research Center, IRCCS MultiMedica, Sesto San Giovanni, 20099 Milan, Italy

Dr. Antonio Frontera

Cardiac Arrhythmia Department, Great Metropolitan Hospital Niguarda, Milan, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
