Clinical Imaging and Newest Therapies for Prostate Cancer

Message from the Guest Editors

Clinical imaging and the latest therapies for prostate cancer have witnessed remarkable advancements, novel therapeutic approaches are reshaping prostate cancer treatment. Innovative therapies, including targeted treatments such as PARP inhibitors, are offering promising outcomes and improved survival rates for patients. Additionally, advances in minimally invasive techniques and robotic-assisted surgeries have reduced the invasiveness of treatments and enhanced patient recovery, and focal therapies are finding a new way in with clinical trials using new laser ablation techniques. In this Special Issue, we invite authors to submit papers on the clinical imaging and newest therapies for prostate cancer. Keywords:

- prostate
- cancer
- multiphoton
- PSMA
- MRI
- lymphadenectomy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
