

## Special Issue

# Clinical Therapeutic Advances in Urological Cancer

### Message from the Guest Editors

We are delighted to introduce this Special Issue, “Clinical Therapeutic Advances in Urological Cancer”, aimed at disseminating the latest research in the field of urological cancer treatment. Urological cancers, including prostate, urothelial, kidney, penile, and testicular cancer, represent a significant global health challenge. The primary objectives of this Special Issue are to assess the current status of research in this field, address core problems in urological cancer therapy, and provide a platform for innovative solutions. This Special Issue’s scope encompasses a wide range of topics, such as novel treatment modalities, biomarker development, personalized medicine, immunotherapy, and advances in surgical techniques. We invite contributions focused on improving early detection, improving treatment efficacy, minimizing side effects, and ultimately enhancing the quality of life of urological cancer patients. We encourage researchers, clinicians, and experts in the field to mobilize their knowledge and experience to advance the clinical therapeutic landscape of urological cancers.
