Hidradenitis Suppurativa: Clinical Diagnosis, Treatment, and Management

Message from the Guest Editor

Hidradenitis suppurativa (HS) is a chronic, recurrent inflammatory skin condition marked by painful nodules, abscesses, draining tunnels, and scarring in intertriginous areas. It significantly affects quality of life and psychosocial well-being. Despite growing awareness, HS is often underdiagnosed, frequently mismanaged, and shares a high prevalence of systemic comorbidities such as metabolic, cardiovascular, rheumatologic, and psychiatric disorders. This Special Issue, “Hidradenitis Suppurativa: Clinical Diagnosis, Treatment, and Management”, aims to deliver a current, clinically focused overview of HS—from early detection and differential diagnosis to validated severity assessments and multidisciplinary long-term management. We invite original research and reviews that explore diagnostic challenges, disease heterogeneity, biomarkers, imaging, and patient-reported outcomes. Special focus should be on innovative medical and surgical treatments, optimizing biologic therapies, managing refractory disease, care transitions, and real-world data on effectiveness and safety across various patient groups. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
