

Special Issue

State of the Art in Surgical Treatment for Colorectal Cancer

Message from the Guest Editor

The Special Issue, entitled "State of the Art in Surgical Treatment for Colorectal Cancer", focuses on remarkable advancements in colorectal surgery, which is the primary treatment for the third most common cancer and fourth leading cause of cancer-related death in developed countries, namely colorectal cancer. In recent years, advances in the techniques and equipment employed for colorectal and abdominal surgery have accelerated significantly, introducing a vast array of new devices and methodologies. Remaining up-to-date on these advancements can be challenging, as ongoing research continues to refine and improve treatment combinations and technologies. This Special Issue is dedicated to exploring these advanced treatment methods and disseminating the latest research regarding innovative devices and techniques for colorectal cancer care. We welcome the submission of original articles, clinical trials, systematic reviews, and meta-analyses.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
