Clinical Advances in Autism Management

Message from the Guest Editor

Autism Spectrum Disorder (ASD) is a neurodevelopmental condition characterized by challenges in social interaction and communication, as well as restricted, repetitive patterns of behavior, interests, or activities. These core features vary widely in severity and presentation across individuals, making the "spectrum" nature of the disorder a key defining trait—ranging from those needing significant support to others who may function independently with targeted interventions. Current interventions for ASD are multifaceted; pharmacological treatments, for example, may address co-occurring conditions such as anxiety, hyperactivity, or sleep disturbances. This Special Issue invites original research exploring ASD's diverse manifestations, underlying mechanisms, innovative therapeutic strategies, and frequent comorbidities—including gastrointestinal issues, epilepsy, and mental health disorders—to advance understanding and improve outcomes for individuals across the spectrum.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
