

Special Issue

Adverse Pregnancy Outcomes: Current Status, Challenges and Future Directions

Message from the Guest Editors

Adverse pregnancy outcomes pose a substantial challenge for obstetricians, with long-term consequences on maternal and neonatal health, including neurological injuries as well as cardiovascular and metabolic disorders. This Special Issue, entitled “Adverse Pregnancy Outcomes: Current Status, Challenges, and Future Directions,” will focus on recent advancements in the screening, prediction, and diagnosis of maternal and neonatal outcomes in the context of preeclampsia, intrauterine growth restriction, preterm birth, gestational diabetes, and intraamniotic infections. Additionally, it will support the peer review of manuscripts that describe the prenatal and intrapartum management of high-risk pregnancies and their outcomes. We welcome high-quality and informative original studies (clinical and experimental), meta-analyses, reviews, clinical cases, and expert opinions. We look forward to receiving your contributions! Dr. Demetra Socolov

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
