# Perioperative Neurocognitive Disorders

### Message from the Guest Editors

Perioperative neurocognitive disorders (PND), encompassing acute postoperative delirium (occurring up to 7 days after surgery), delayed neurocognitive recovery (cognitive decline diagnosed up to 30 days after surgery) and postoperative cognitive decline (POCD, cognitive decline diagnosed up to 12 months thereafter), are the main health concerns for elderly patients scheduled for anesthesia and surgery. The resulting cognitive decline not only has a detrimental impact on patients' quality of life, puts them at risk of developing dementia and can even cause death but also imposes a substantial socioeconomic burden on the society. The pathophysiology of PND is multifaceted. Clinical and laboratory evidence suggests that stress, inflammation and pre-existing neurocognitive disorders are essential contributing factors to PND. More studies are required to identify potential therapeutic targets and prevention strategies to improve the outcome of surgery. **Topics will include:**

- The epidemiology of perioperative neurocognitive disorders (including delirium and POCD);
- The mechanisms for PND;
- Biomarkers for PND;
- Interventions for PND.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
