Non-Small-Cell Lung Cancer: Recent Advances in Therapeutic Approaches

Message from the Guest Editors

We are witnessing extraordinary oncological and medical changes in the management of lung cancer. This change in paradigm is principally due to the significant advancement of technology (both in surgery and oncology), the advent of AI (artificial intelligence), or the development of new, more and more precise, anti-neoplastic drugs. We aim to publish articles describing recent advances in the treatment of non-small-cell lung cancer, from minimally invasive and robotic surgery for early or locally advanced lung cancer to more complex cases, including post-neoadjuvant (immunotherapy or biological therapy) surgery. In this Special Issue, we would even like to explore bronchoscopic advances with new robotic bronchoscopy (ION) or electromagnetic navigation bronchoscopy and all medically innovative treatments. In this Special Issue, we invite authors to submit papers on all the recent advances in the therapeutic approaches to NSCLC (non-small-cell lung cancer).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
