Experience and New Application in Otolaryngology and Maxillofacial Surgery

Message from the Guest Editor

With the rapid development of medical equipment and surgical techniques and the widespread dispersion of innovative biological materials, otolaryngology and maxillofacial surgery have changed dramatically in recent decades. Virtually planned surgery has improved accuracy and safety in patient treatment, and nowadays, ENT and maxfac surgeons live in an era of patient-customized medicine, the use of which has become routine. Moreover, minimally invasive endoscopic surgery and the use of robotics have proven to be more advantageous than conventional open surgery methods, both in terms of maximizing the preservation of natural anatomy and minimizing postoperative complications. This Special Issue aims to explore surgical experiences and the gold standard achieved in the relevant fields of interest in the past and simultaneously seeks to cover current and future trends to collect well-written scientific papers on head and neck surgery. We hope to receive many submissions from experts willing to contribute to this topic.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
