Special Issue

Treatment and Digital Outcome Assessment in Orthopaedic Trauma

Message from the Guest Editors

Orthopaedic trauma treatment has evolved significantly, with a growing emphasis on minimally invasive techniques and evidence-based rehabilitation protocols. Concurrently, digital tools such as wearable sensors, mobile applications, and advanced imaging technologies are revolutionising outcome assessment by providing objective, real-time data on patient recovery. These tools enable clinicians to monitor functional recovery, biomechanical performance, and patient-reported outcomes with unprecedented precision. However, challenges remain in integrating these digital tools into clinical practice. This Special Issue invites submissions that explore the development, validation, and clinical application of digital tools for outcome assessment in orthopaedic trauma, as well as studies that focus on innovative treatment approaches. We encourage researchers and clinicians to contribute their insights and expertise to this important and timely topic. We welcome original research and reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
