

Special Issue

Migraine: Current Advances and Future Options

Message from the Guest Editor

Dear colleagues, What is migraine?

- Discuss that migraine is only a phenotype it is caused by multiple genetic and neurochemical abnormalities (which is why there are no agents universally effective in migraine treatment)

Why are migraines bad for you?

- Discuss pain and disability, but also comorbidities including cardiovascular and psychiatric ones
- Progression of migraine predicted by burden of migraine at the baseline
- Current acute medications; their uses and limitations
- Current preventive medications; their uses and limitations
- Agents that are being currently studied and their rationale

Guest Editor

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
