

## Special Issue

# Physical Therapy in Musculoskeletal Disorders: Prevention, Diagnosis, Clinical Management and Treatment

### Message from the Guest Editor

The progress of evidence in physiotherapy in recent decades is highlighting the importance of this health specialty in the treatment of our patients. One of the main areas of interest in physiotherapy research is the approach to musculoskeletal pathologies, from a preventive, diagnostic and therapeutic point of view. In the same way, the development of studies with a high methodological quality is allowing this evidence to be reproduced in the clinical setting in a direct way, thus favoring a direct approach to patients. In this Special Issue, we invite authors to present papers on the progress in preventive, diagnostic and therapeutic measures in patients with musculoskeletal diseases, from the field of physiotherapy.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
