

## Special Issue

# Breast Cancer: Clinical Diagnosis and Personalized Therapy

### Message from the Guest Editor

Dear Colleagues, Breast cancer treatment has significantly changed and expanded in the last few decades, mainly due to the increased understanding of the molecular factors contributing to breast cancer pathogenesis and heterogeneity. Although overall survival has improved due to advanced diagnostic modalities as well as the introduction of tailored treatments directed at specific patient populations, there is still room for improvement. This Special Issue addresses the topic of precision medicine and novel research in the field of diagnosis, predictive biomarkers, loco-regional treatment (radiation and surgery), and systemic treatments.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
