New Clinical Advances in Breast Reconstruction

Message from the Guest Editor

Breast reconstruction is a crucial aspect of post-mastectomy care, significantly improving patients' quality of life. In recent decades, advancements in microsurgery, implant technology, and autologous tissue reconstruction have expanded options for patients. Despite these innovations, challenges remain, such as optimizing reconstruction for radiotherapy patients, reducing complications, and improving aesthetic and functional outcomes. This Special Issue aims to highlight cutting-edge research addressing key issues in breast reconstruction, including long-term implant safety, flap viability, fat grafting techniques, endoscopic surgery, robotic surgery, and patient-reported outcomes. We seek to explore solutions for minimizing complications, enhancing surgical precision, and personalizing treatment plans. We welcome the submission of original research, clinical studies, and reviews covering surgical innovations, patient-centered outcomes, and novel reconstructive techniques. Papers addressing postoperative care, complication management, and emerging technologies are also encouraged.

Guest Editor

Prof. Dr. Nobuyuki Mitsukawa

Department of Plastic, Reconstructive and Aesthetic Surgery, Graduate School of Medicine, Chiba University, Chiba 260-8670, Japan

Deadline for manuscript submissions

20 June 2026

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
