New Advances in Myasthenia Gravis

Message from the Guest Editor

Myasthenia gravis (MG) is a chronic autoimmune disorder that affects neuromuscular transmission, leading to muscle weakness and fatigue. Recent advancements in immunotherapy, biological markers, and neuroregenerative strategies offer new hope for improving the diagnosis and management of MG. This Special Issue, titled 'New Advances in Myasthenia Gravis', aims to collect cutting-edge research that explores innovative treatment modalities, underlying mechanisms, and long-term management strategies for MG patients. We encourage contributions from a wide range of studies, including clinical trials, translational research, drug repurposing, and basic science that highlight the impact of novel therapeutic interventions and patient care models. The issue seeks to provide a comprehensive overview of the latest scientific discoveries and their implications for future research and clinical practice in neuromuscular disorders. We look forward to your valuable submissions, which will further our understanding of myasthenia gravis and promote better outcomes for patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
