New Advances in Myasthenia Gravis

Message from the Guest Editor

Myasthenia gravis (MG) is a chronic autoimmune disorder that affects neuromuscular transmission, leading to muscle weakness and fatigue. Recent advancements in immunotherapy, biological markers, and neuroregenerative strategies offer new hope for improving the diagnosis and management of MG. This Special Issue, titled 'New Advances in Myasthenia Gravis', aims to collect cutting-edge research that explores innovative treatment modalities, underlying mechanisms, and long-term management strategies for MG patients. We encourage contributions from a wide range of studies, including clinical trials, translational research, drug repurposing, and basic science that highlight the impact of novel therapeutic interventions and patient care models. The issue seeks to provide a comprehensive overview of the latest scientific discoveries and their implications for future research and clinical practice in neuromuscular disorders. We look forward to your valuable submissions, which will further our understanding of myasthenia gravis and promote better outcomes for patients.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
