Artificial Intelligence, Computer Modeling and Technology: Clinical Changing Practice in Reconstructive Surgery

Message from the Guest Editors

We would like to invite you to contribute to our new Special Issue for *JCM* entitled 'Artificial Intelligence, Computer Modeling and Technology: Clinical Changing Practice in Reconstructive Surgery'. The integration of AI and computer learning into clinical medicine is revolutionizing the way medical treatment is delivered, enhancing both diagnostic accuracy and patient outcomes. By analyzing vast amounts of medical treatment data, including medical histories, imaging results, and genetic information, machine learning algorithms can identify patterns and predict disease outcomes with remarkable precision. This technology enables personalized treatment plans tailored to individual patients, improving the efficacy of interventions while minimizing adverse effects. Additionally, computer learning aids in early disease detection and streamlining workflows. We envisage that this Special Issue will highlight ongoing changes in current medical and reconstructive surgical management and will offer insights into the rapidly changing environment in this field.

Guest Editors

Prof. Dr. Warren Matthew Rozen

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
