Retinal Imaging: Clinical Applications, Updates and Perspectives

Message from the Guest Editors

Retinal imaging is essential for the diagnosis, monitoring and treatment decisions of retinal diseases. Currently, there are a number of imaging modalities available, including optical coherence tomography (OCT), OCT angiography, autofluorescence, widefield color fundus/fluorescein/indocyanine green imaging or adaptive optics-assisted imaging (OCT, scanning laser ophthalmoscope). These cutting-edge technologies allow the visualization of a wide range of different aspects of the retina from a scale where individual cells are visible up to the depiction of a large field of views covering retinal areas even in the far periphery. Some of these novel imaging systems still require clinical validation to prove their applicability in routine clinical practice, particularly with new treatment modalities on the horizon. The ultimate goal of these imaging advancements is to positively support the clinician's approach for diagnosing and treating various vitreoretinal diseases, including diabetic retinopathy, age-related macular degeneration, retinal vessel occlusions, retinal detachment, uveitis, retinal dystrophies and others.

Guest Editors

Dr. Andreas Pollreis

Department of Ophthalmology and Optometry, Medical University Vienna, 1090 Vienna, Austria

Dr. Thomas Ach

Department of Ophthalmology, University Hospital Bonn, 53127 Bonn, Germany

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
