Gynecologic Oncology: Diagnosis, Targeted Therapies, and Management

Message from the Guest Editor

Today, gynecologic oncology is still a topic worthy of attention, and its research is not rare. The key aim of this field is to diagnose and treat female genital tumors, especially breast cancer; ovarian cancer, cervical cancer, and vulvar squamous cell carcinoma; endometrial carcinoma; fallopian tube carcinoma; and uterine carcinosarcoma. We are organizing a Special Issue on gynecologic oncology which aims to collect articles focusing on new diagnostic and treatment methods for various gynecological cancers.

Researchers in the fields of gynecologic oncology, surgical oncology, and reproductive medicine are encouraged to submit their findings as original articles or reviews to this Special Issue. We welcome different opinions and voices to contribute to this field together.

Guest Editor

Dr. Giuseppe Angelico

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
