Challenges in Spinal Deformity

Message from the Guest Editor

The prevalence of Adult Spinal Deformity (ASD) has grown over the last three decades as the importance of spinal health is increasingly recognized. Patients with adult spinal deformities often have other medical comorbidities, including high levels of frailty, which makes ASD surgery particularly challenging and complex. Yet, surgical correction of ASD has been demonstrated to reduce the physiological and psychological burden of spinal malalignment, though significant challenges remain regarding the prevention and identification of post-operative outcomes complications. Whether it be the elucidating of novel hurdles of minimally invasive technique, or tackling complex multi-dimensional correction of severe deformity, improving corrective strategies and addressing the ever-increasing complexities and challenges that ASD surgery presents to physicians, patients, and institutions remains of paramount importance. In the present Special Issue, we present an overview of each technique, focusing our interest on the challenges of treating adult spinal deformity, as well as presenting the most recent approaches and techniques to address such hurdles.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
