Special Issue

Personalized Therapy and Clinical Outcome for Retinal Diseases

Message from the Guest Editor

This Special Issue focuses on the growing significance of personalized therapy in the management of retinal diseases—a crucial area in modern clinical ophthalmology. Retinal diseases such as diabetic retinopathy, age-related macular degeneration, and inherited retinal disorders exhibit diverse pathophysiological mechanisms, requiring individualized treatment approaches. This Special Issue will highlight emerging trends in precision medicine, advances in retinal imaging, biomarker-driven therapies, and artificial intelligence-supported clinical decision-making. It will also explore the integration of genetic, molecular, and clinical data to enhance diagnostic accuracy and therapeutic outcomes. We aim to provide a platform for sharing original research and clinical trials that contribute to personalized retinal care. We encourage contributions from clinicians and researchers alike to broaden the discussion and accelerate innovation in this field. This Special Issue aims to support the advancement of personalized ophthalmic care and improve the quality of life of patients with retinal diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
