Clinical Advances in Minimally Invasive Urologic Surgery

Message from the Guest Editors

Minimally invasive surgery has undergone significant advancements in urology, fundamentally transforming patient care. These innovations, including laparoscopy, robotic-assisted surgery, and endourology, have redefined surgical approaches by offering patients less invasive alternatives, characterized by a reduction in postoperative discomfort, shorter hospital stays, and accelerated recuperation periods, especially when compared with traditional open surgeries. Through these techniques, urologists can execute more and more challenging procedures with precision while also minimizing tissue trauma. Consequently, the spectrum of treatable conditions using minimally invasive strategies, spanning from prostate cancer to urinary incontinence, has substantially expanded. As technology continues to progress and surgical expertise evolves, the horizon of urologic surgery holds promise for further enhancements using minimally invasive approaches. In this Special Issue, we welcome authors to submit papers on the clinical advancements in minimally invasive urologic surgery across the entire field of urological surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
