

Special Issue

Clinical Practices of Critical Care in Emergency Medicine

Message from the Guest Editor

In recent years, emergency medicine has increasingly integrated high-intensity therapeutic practices traditionally associated with intensive care, reinterpreting them through a less invasive lens. This Special Issue aims to explore how core elements of critical care, such as ventilation, hemodynamic monitoring, and pharmacological management, can be adapted to the emergency setting using non-invasive or minimally invasive tools and strategies. Early use of non-invasive monitoring, non-invasive ventilatory support applications, and timely initiation of pharmacological therapies guided by personalized clinical indicators make it possible to deliver high-level care while minimizing the invasive burden on patients. This approach can lead to earlier improvements in clinical outcomes, reduce the need for intensive care, and optimize the use of available resources. We welcome original research, systematic reviews, and clinical experiences that examine the adaptation of intensive care practices to the emergency setting, with particular focus on clinical effectiveness, feasibility, and impact on patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
