

## Special Issue

# Scoliosis and Spinal Deformity: Current Diagnosis, Treatment and Clinical Management

### Message from the Guest Editor

Spinal deformities severely affect the lives of many people and frequently lead to morbidity. They have been the subject of many years of dedicated research into their etiology and pathogenesis. In the meantime, their management, both conservatively and surgically, although based to a large extent upon classic principles, has been revolutionized in recent decades. Modern imaging modalities aim to provide accurate three-dimensional images of the spine, as well as of essential soft tissue structures, such as the spinal cord, the nerve roots and the great vessels. The treatment of spinal deformities, although better than ever before and requiring fewer days in hospital, remains extensive, is associated with serious risks, and usually sacrifices the motion of certain spinal segments that are meant to move. This Special Issue aims to collect the latest research on the etiology and pathogenesis, imaging, and treatment of scoliosis and spinal deformities. It is my great pleasure to invite you to contribute a paper to this Special Issue.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
