Advances in Chronic Pain and Related Management

Message from the Guest Editor

Chronic pain is a significant health burden in industrialized societies, being a leading cause of disability. It is highly prevalent and often coexists with psychological issues such as anxiety, depression, insomnia, and cognitive disorders. Chronic pain impacts quality of life and generates substantial social health expenses, including economic costs from absenteeism, reduced productivity, and disability. Despite its prevalence, there is no proven effective therapy for chronic pain management, leading to international resolutions recognizing adequate pain therapy as a human right. With population aging, chronic pain is expected to increase, further raising social health costs. Chronic pain is a multidimensional phenomenon involving cognitive, emotional, and physiological aspects. This Special Issue aims to explore the diagnosis, treatment, prevention, and management of chronic pain, focusing on patient experiences and advancing research in the field. Researchers are invited to contribute original studies or reviews to provide clinical updates and perspectives on chronic pain management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
