

Special Issue

Crohn's Disease and Ulcerative Colitis: Pathophysiology and New Therapeutic Strategies

Message from the Guest Editors

This Special Issue concerns the recent therapeutic developments in the management of Crohn's Disease and Ulcerative Colitis. There is a particular focus on the role of the intestinal microbiome in the development of Crohn's Disease and Ulcerative Colitis, as well as the therapeutic place of new probiotics in the management of these conditions. The Special Issue also reflects on the place of newer biologic therapies and JAK inhibitors in the control of inflammatory process. We will also welcome studies focusing on stem cell therapy and other new drugs targeting the inflammatory process. All studies and reviews relating to the mechanisms and therapeutic strategies of Crohn's Disease are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
