

Special Issue

Innovations in Coronary Artery Disease Treatment and Prevention

Message from the Guest Editor

This Special Issue will serve as a platform to explore **emerging therapies and preventive measures**, targeting both the root causes and clinical manifestations of CAD. We welcome a diverse array of submissions, including but not limited to:

- **Innovative Biomarkers:** Contributions on predictive and diagnostic biomarkers for early detection, prognosis, and treatment personalization.
- **Advanced Imaging Techniques:** Research on next-generation imaging modalities that improve diagnostic accuracy and guide treatment planning.
- **Pharmaceutical and Surgical Advances:** Investigations into new drug therapies, interventional approaches, and minimally invasive surgical techniques.
- **Lifestyle and Behavioral Interventions:** Studies on evidence-based lifestyle interventions that contribute to CAD prevention and management.
- **Technological Innovations:** Papers on artificial intelligence, machine learning, and predictive analytics that enhance early diagnosis, risk stratification, and treatment optimization.
- **Interventional Cardiology:** Original research on procedural advancements, innovative device designs, and emerging techniques in coronary stenting and revascularization.
