Special Issue

Personalized Therapy and Clinical Outcomes for Congenital Heart Disease

Message from the Guest Editors

Congenital heart disease (CHD) remains one of the most prevalent and challenging health conditions. Despite significant advances made in the diagnosis and treatment of CHD, there is still considerable variability in clinical outcomes among affected individuals. This diversity underscores the complex interplay of genetic, environmental, and developmental factors that contribute to the heterogeneous nature of CHD. Tailoring treatment strategies to the unique physiological characteristics of each patient holds the promise of optimizing clinical outcomes and improving long-term prognoses. From genomic profiling to advanced imaging techniques, the tools available for personalized medicine in CHD continue to evolve rapidly, offering unprecedented opportunities for precision diagnosis and targeted interventions. This Special Issue of the *Journal of Clinical Medicine* aim to shed light on the challenges and opportunities that lie ahead in the pursuit of personalized care for individuals with CHD. We invite original research articles and reviews that contribute to our Special Issue.

Guest Editors

Dr. Giancarlo Scognamiglio Adult Congenital Heart Disease, Monaldi Hospital, Naples, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
