

Special Issue

Future Trends in the Diagnosis and Management of Celiac Disease

Message from the Guest Editors

This Special Issue's focus is on the future trends in CeD, within which several topics can be addressed, including the following: What are the current clinical features of more recent celiac disease diagnoses? What are the unsolved health issues left after an appropriate gluten-free diet? What about new biomarkers or new approaches to the use of old ones? Also, CeD diagnosis in adults relies on detecting serum gluten-related antibodies in conjunction with intestinal biopsies. However, recent studies have proposed a non-biopsy serological diagnosis of CeD based on detecting high-titre tTG IgA. How will this information change the guidelines for adult diagnosis? At present, the lifelong exclusion of gluten-containing cereals from one's diet represents the only available therapeutic strategy for celiac disease. However, new therapeutic options, substituting or accompanying a gluten-free diet, are emerging.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
