

Special Issue

Foot and Ankle Surgery: State of the Art and Future Perspectives

Message from the Guest Editors

This edition focuses on foot and ankle surgery areas, including hallux disorders, lesser toe problems, diabetic foot salvage strategies, complex calcaneal fractures, pilon fractures, and ligament disorders. This special edition would welcome any topics that challenge our foot and ankle surgeons. These topics are essential to modern orthopedic practice and represent the many challenges and opportunities that foot and ankle surgeons face today.

The articles in this special edition showcase innovative surgical techniques, meaningful research findings, and practical, evidence-based strategies to improve patient outcomes. Leading experts have shared their knowledge and experiences, offering new perspectives on emerging methods, advanced technologies, and solutions to some of the toughest problems in orthopedic and trauma surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
