Clinical Management of Liver Cancers

Message from the Guest Editors

Liver carcinoma, characterized as a significant and prevalent malignancy, is a leading contributor to the global mortality burden. The pathogenesis of liver carcinoma is multifaceted, with several risk factors playing a crucial role. Prominent among these are lifestyle-related choices such as excessive tobacco use and alcohol consumption. Additionally, viral etiologies, particularly infections caused by hepatitis B and C viruses, significantly enhance the risk of developing this malignancy. This Special Issue is poised to offer a comprehensive exploration of liver carcinoma, bridging the gap between basic scientific research and clinical practice. We look forward to your excellent clinical research Articles and Reviews. **Keywords**

- hepatocellular carcinoma
- cholangiocarcinoma
- mixed hepatocellular carcinoma–cholangiocarcinoma
- combined hepatocellular carcinoma–cholangiocarcinoma
- liver cancers

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
