Advances in the Diagnosis and Treatment of Gastrointestinal Stromal Tumors

Message from the Guest Editors

In recent decades, there have been several developments in biology of gastrointestinal stromal tumors (GIST) that enhance new diagnostic and therapeutic strategies. Surgery remains the cornerstone treatment in localized disease and can also be clinically relevant in the metastatic setting. However, the introduction of tyrosine kinase inhibitors (TKIs) was revolutionary in treating GIST patients, as it established treatment algorithms for patients with advanced GIST. Novel therapeutic strategies focus on overcoming the heterogeneity of KIT or platelet-derived growth factor receptor (PDGFRA) secondary mutations and providing more potent inhibition of specific challenging mutations. Recently, new TKIs have been approved in patients harboring *PDGFRA* exon 18 D842V mutations. Additionally, there are several experimental therapies under investigation that could advance individualized patient care. In this Special Issue, we would like to invite original clinical and basic research, meta-analyses, and state-of-the-art reviews related to advances in the diagnosis and treatment of gastrointestinal stromal tumors. We will be grateful to receive your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
