Advances in Clinical Management of Bipolar Disorder: 2nd Edition

Message from the Guest Editor

Bipolar disorder is a disabling illness due to its early onset, severity and chronicity. Its global prevalence in 2019 was estimated at nearly 40 million patients, and the disorder poses a risk for patients' well-being, not only through direct negative outcomes but also through indirect effects associated with poverty, suicide and comorbid health issues. Furthermore, bipolar disorder places a considerable burden on families and significant others. These facts point to the significance of appropriate therapeutic interventions for bipolar disorder. To a large extent, the first onset of the disorder will require hospitalization, with a high chance for subsequent re-entries to a clinical environment. The aim of this Special Issue is to highlight the difficulties in the clinical handling of bipolar disease and any new treatment solutions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
