Clinical Advances in Autoimmune Disorders

Message from the Guest Editors

Systemic sclerosis (SSc) is an extremely heterogeneous systemic autoimmune disease, characterized by fibrosis of the skin and internal organs, endothelial dysfunction with mechanical and functional damage to the microcirculation, and the aberrant activation of the immune system with the production of autoantibodies. Among autoimmune diseases, it has the highest mortality rate related to the disease itself due to visceral involvement. Complications include digital ulcers, pulmonary arterial hypertension, interstitial lung disease, and scleroderma renal crisis. This Special Issue of the *Journal of Clinical Medicine* will highlight the latest research findings and clinical advancements in the field of SSc and its complications. The aim is to provide a comprehensive overview of the current state of knowledge and to explore innovative therapeutic approaches that could improve patient outcomes and ensure optimal short- and long-term management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
