

Special Issue

Manual Therapy for the Prevention and Management of Musculoskeletal and Related Disorders across the Life Course

Message from the Guest Editors

This Special Issue aims to investigate and showcase the latest clinical updates in manual therapies for musculoskeletal and related systemic illnesses across different life stages. We seek to promote safe and effective manual therapy interventions that support healthy pregnancy, children's well-being and development, occupational health and safety, and interventions for older adults to manage declines in intrinsic capacity. We invite the submission of research articles, review articles, perspective papers, and so on.

Guest Editors

Dr. Christian Lunghi

Osteopatia Lunghi-Baroni, Private Practice, Rome, Italy

Dr. Federica Tamburella

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
