Updates in Corneal and Glaucoma Surgery

Message from the Guest Editors

Corneal and glaucoma surgery have continued their rapid development in recent years. Corneal transplantation has been revolutionized by anterior and posterior lamellar techniques, whereas corneal collagen cross-linking has completely changed the management of keratoconus and other forms of corneal ectasia. The development of new devices for micro-invasive glaucoma surgery (MIGS) has brought new therapeutic prospects to glaucoma patients, together with newly designed tube implants. This Special Issue intends to provide an update of the current and future surgical techniques in the subspecialty fields of corneal and glaucoma surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
