

Special Issue

PET Imaging in Bone and Non-Bone Diseases

Message from the Guest Editors

In the realm of diagnostic and monitoring tools, PET imaging stands out as a robust modality. PET scans serve as invaluable assets in the assessment of a spectrum of metabolic bone diseases, encompassing osteoporosis, Paget's disease, CKD-related conditions, medication-related osteonecrosis of the jaw, and metastatic bone diseases. Additionally, they provide critical insights into atherosclerotic diseases, autoimmune conditions such as rheumatoid arthritis; osteogenic bone disorders encompassing fibrodysplasia ossificans progressive.

This Special Issue will focus on shedding light on recent advancements and future trajectories in the field, with a focus on standardizing protocols and validating innovative biomarkers. Furthermore, this Special Issue will aim to delve into the utilization of existing data resources to refine diagnostic criteria and harness the capabilities of automated analysis through traditional and modern artificial intelligence and machine learning.

We invite you to join us on this scholarly journey through the frontiers of PET imaging, as we uncover novel insights and pave the path towards enhanced diagnosis and treatment of bone diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
