Exploring Recent Advancements in Migraine Treatment: Insights from Clinical Neurology

Message from the Guest Editors

The treatment landscape for migraine has witnessed significant advancements in recent years. Migraine, a complex, prevalent, and highly disabling neurological disorder, is often underdiagnosed and undertreated. In recent years, there have been important advances in the pathophysiology of the disease that have facilitated the development of new drugs for both the symptomatic and preventive treatments. These novel therapies not only expand the range of available treatments but also offer substantial advantages due to their specificity for migraine treatment, increased effectiveness, and improved tolerability. This thematic Special Issue aims to explore the challenges contributing to the undertreatment of migraine, emphasizing recent therapeutic breakthroughs and underscoring the importance of initiating symptomatic and preventive treatment in the early phases. By providing a practical perspective, it enables clinicians to familiarize themselves with innovative treatments.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
