Approaches to Prevention and Management of Postoperative Complications in Minimally Invasive Surgery

Message from the Guest Editor

The aim of this Special Issue, “Approaches to Prevention and Management of Postoperative Complications in Minimally Invasive Surgery”, is to highlight recent advances in minimizing and managing early and late postoperative complications following minimally invasive surgical procedures. We invite submissions from diverse specialties, including thoracic, gastrointestinal, hepatobiliary–pancreatic surgery, gynecology, and urology, to foster a multidisciplinary discussion. Topics of interest include preoperative risk assessment, intraoperative techniques, and postoperative care strategies aimed at preventing and managing issues such as bleeding, organ injury, bowel obstruction, surgical site occurrence, incisional hernia, and anesthetic-related events. This Special Issue will also explore the role of technology, patient optimization, and multidisciplinary approaches in improving postoperative outcomes. Furthermore, it will emphasize how minimally invasive surgery affects patient care and patient satisfaction, with a focus on patient-reported outcomes and their impact on overall quality of care.

Guest Editor

Dr. Shingo Tsujinaka

Division of Gastroenterological Surgery, Department of Surgery, Tohoku Medical and Pharmaceutical University, Sendai 983-8536, Japan

Deadline for manuscript submissions

15 July 2026

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
