Hematologic Malignancies: Treatment Strategies and Future Challenges

Message from the Guest Editor

We would appreciate it if you would contribute to the upcoming special issue of the Journal of Clinical Medicine, "Hematologic Malignancies: Treatment Strategies and Future Challenges". Hematologic malignancies are among the most prevalent cancers, and their incidence has increased in recent decades. Despite clinical progress, challenges such as relapse, refractory cases, and drug resistance still remain. The main purpose of this research theme is to introduce current therapeutic strategies and, as future challenges, to explore the future of hematologic malignancies, such as discovery of new targets or biomarkers and epigenetic drugs. It also includes the development of novel drugs in combination with conventional chemotherapeutic agents to reduce side effects and resistance in hematologic malignancies. Authors are encouraged to submit original research papers, reviews. We encourage submissions that provide new insights into underlying proliferation and resistance mechanisms in the treatment of hematological malignancies and discuss the clinical implications of these findings.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
