Systemic Autoimmune Disorder with Pulmonary Involvement: Novel Insights from Underlying Mechanisms of Drug Development and Intervention

Message from the Guest Editor

Rheumatic diseases include a wide range of disorders with a notable impact on quality of life, as well as significant morbidity and mortality worldwide. Pulmonary involvement is overall frequent, representing a prognostic factor of negative outcomes in patients with connective tissue disorders. During the last few decades, several studies have addressed the immune-mediated mechanisms of lung involvement in patients with systemic autoimmune disorders (SARDs). The clinical breakthrough of novel antifibrotic agents and their interconnection with different immunomodulatory agents have led to significant changes in the therapeutic scenario. In this Special Issue, we aim to include original research and review articles focused on early diagnosis, and innovative treatments for patients with pulmonary involvement of systemic autoimmune disorders.

- rheumatic diseases
- pulmonary involvement
- connective tissue disorders
- diagnosis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
