

Special Issue

Current Trends in Pediatric Endocrinology

Message from the Guest Editor

Over the last few years, progress in research on the field of pediatric endocrinology has been impressive. In particular, in the field of bone pathology (achondroplasia, XLH) new and promising therapeutic treatments have become concretely available which were unthinkable until a few decades ago. However, some topics remain popular in other sectors due to the management in the real world of the rarest conditions, such as primary adrenal insufficiency, congenital adrenal hyperplasia (CAH), rarer differences of sex development (DSD), among others. Finally, severe obesity in children, especially with an early onset, has become a difficult diagnostic and therapeutic task for pediatric endocrinologists for decades. This Special Issue aims to highlight some of the most interesting topics of pediatric endocrinology that perhaps less discussed in order to bring out an exciting scientific discussion and attempt to improve the outcomes of patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
